

Productivity, Health & Income Plan

Sourov Deb · Saint-Pierre, La Réunion · Built on the medical record (19 May 2026) and your documented assets

What this plan does differently

It fuses two things that usually fight each other: a health routine that respects bipolar I, ADHD, depression and clinical insomnia — and a money engine that fits inside that routine instead of breaking it. Every income stream below is matched to a mood-state and an attention pattern. You earn *with* the condition, not against it.

The science it is built on

- **Ultradian rhythm** (Kleitman): the brain works in ~90-minute cycles. Work in one cycle, rest, repeat — do not grind past it.
- **ADHD & interest-based nervous system** (Dodson): focus follows interest and urgency, not importance. Route money tasks to high-interest formats.
- **Bipolar & social rhythm therapy** (Frank et al.): stable daily rhythm (fixed wake, meals, sleep) measurably reduces mood episodes. Income stability depends on rhythm stability.
- **Behavioural activation** (depression): action precedes motivation, not the reverse. One small paid task can lift a flat day.
- **Task-batching & context-switching cost** (APA): switching tasks costs up to 40% of productive time. Batch similar money work into single blocks.

Part 1 — Your Documented Income Assets

This is what you already hold — not aspirational. Every stream in this plan draws on these.

Asset (verified in your file)	Income use	Premium angle
Cambridge CELTA (2026)	Qualifies you on every tutoring platform + raises your hourly rate immediately	
IELTS Specialist (IDP, Feb 2026)	Exam-prep tutoring — highest-paying niche	€25–50/h, results-driven demand
DCL Français (GRETA)	Bilingual credibility FR/EN	Opens French corporate clients
11 yrs anglophone hospitality	Business + Hospitality English	Corporate & hotel training, La Réunion tourism
Aviation / Medical English	Specialist English	Premium niche: Air Austral, clinics
Sommelier & barista certs	Hospitality content + niche teaching	Wine/F&B English — rare, distinctive
4–5 languages	Multilingual tutoring + content reach	Bengali/Hindi markets underserved online
YouTube + photo/video (4 tools)	Content income + service income	Edit-for-hire, course creation, ad/sponsor
61-org outreach list (built)	Warm B2B pipeline already started	35 active leads awaiting follow-up

Part 2 — The Three-Tier Income Engine

Three tiers by speed-to-cash and effort. Run them in parallel, but launch in order.

Tier 1 — Cash this month (online 1:1 tutoring)

Fastest route. Your deep-research file verified these platforms and rates. Sign-up takes 1–2 weeks; first lessons can pay within days of approval.

Platform	Course types	Verified rate	Signup
Preply	1:1 + business courses	€15–50/h	preply.com/en/become-a-tutor

Platform	Course types	Verified rate	Signup
iTalki	1:1 + professional classes	€12–40/h	italki.com/teacher/apply
Lingoda	Live group + private (FR-friendly)	€25–45/h	teach.lingoda.com
Verbling	1:1 + group	€10–45/h	verbling.com
Superprof (FR)	Local + online, you set price	You set rate	superprof.fr

Launch moves: 1) Put "Cambridge CELTA Certified" in the first line of every profile — it raises both visibility and rate. 2) List specialist tracks (Aviation, Medical, Business English) for premium pricing. 3) Start on Preply + iTalki together; let the algorithms compete for you. Realistic ramp: €500–€2,000/month within the first 1–3 months at 10–15 hours/week.

Tier 2 — Build over 1–3 months (B2B + content services)

- **Follow up the 35 active leads** in your outreach CSV. The pipeline exists; it needs the weekly send-and-track rhythm (your SMART_EMAIL_COMPOSER does this).
- **Corporate / centre contracts** — CCI, GRETA, hotels, Air Austral. Higher day-rates, CPF/OPCO-fundable once you register as a trainer.
- **Video editing / content service** — you have 4 software tools. Edit-for-hire for other creators or local businesses on Fiverr/Malt (FR freelance platform).
- **Specialist workshops** — one-off paid sessions (Aviation English, Hospitality English) marketed to local employers.

Tier 3 — Compounds over 3–12 months (assets that pay while you rest)

- **YouTube channel** — teaching + neurodiversity. Ad revenue + sponsorship build slowly but pay passively once the catalogue grows.
- **Self-paced course** — package your IELTS or Aviation English into a recorded course (Udemy, Teachable). Build once, sell repeatedly.
- **The book + the story** — advances, speaking fees, and the platform that raises every other rate. (Outreach letters already drafted in your files.)
- **Blog — Medium Partner Program / Substack** — modest but compounding, and it feeds the book and the channel.

Why this order: Tier 1 stabilises cash and mood (income reduces stress, stress reduces episodes). Tier 2 raises the ceiling. Tier 3 builds assets that earn on your low-energy days — the days the condition guarantees you will have.

Part 3 — Routing Income Work by Mood-State

This is where health and money meet. Match the income task to the state — never force creation on a crash day or admin on a high day.

State	Best income work	Why it fits
Elevated / hypomanic	Film videos, draft course, write book/blog, cold-pitch	High energy + idea flow suit creation and outreach
Stable / level	Teach scheduled lessons, send applications, edit	Reliable focus suits client-facing, structured work
Flat / low	Reply to 1 student, light editing, file invoices	Low-cognitive paid admin keeps income alive without strain
Crash / shutdown	Tier-3 assets earn for you; do nothing new	Pre-built courses/videos/ads pay while you recover

This is the core insight: build Tier-3 assets during highs so they carry your income through the lows. Bipolar makes consistent daily output impossible — so engineer income that does not require it.

Part 4 — The Integrated Day (health + income)

Built around morning Concerta, your sharp late-morning window, and severe afternoon sleepiness.

Window	Health layer	Income layer
On waking	Meds, water, light, one-line mood read	Glance at today's booked lessons / one money task
~1.5h after meds	Deep block 1 (25/5 ×2–3)	Highest-value task: teach a premium lesson OR create Tier-3 asset
Late morning	Deep block 2 (if energy holds)	Second teaching slot OR outreach follow-ups (batch them)
Early afternoon	Low-cognitive window	Paid admin: invoices, student messages, scheduling, light edits
Afternoon dip	Rest / nap / walk (non-negotiable)	Tier-3 earns passively — do not schedule live work here
Late afternoon	Light creative, interest-led	Film B-roll, edit video, record course segments
Evening	Wind-down, screens off ~1h pre-bed	Prep tomorrow's lessons; stop. No new launches at night.

Schedule live lessons in your stable morning window. Never book clients into the afternoon dip — cancellations from fatigue cost you rating and money on platforms.

Part 5 — The Non-Negotiable Foundation

No income engine runs on a broken foundation. These come first, always.

Sleep (from your clinical ISI score):

- Fixed wake time every day — the strongest single regulator of bipolar mood (social rhythm therapy).
- Screens off ~1h before bed; take hydroxyzine as prescribed.
- Push the referred sleep study (polysomnography) — untreated apnea would sabotage focus, mood, and earnings.

Treatment that protects income:

- **ALD via Dr. Pauvert** — frees the cost of all psychiatric care (money kept, not earned, but the fastest financial win).
- **MDPH / RQTH** — unlocks AGEFIPH funding for training + auto-entrepreneur setup, plus employment protections.
- **Monthly psychiatric review** — the mood-stabiliser decision lives here; stable mood = consistent income.
- **UPT trauma referral** — pending; book when the letter arrives.

Income and treatment are one system. Stable sleep and mood are the engine; the money tiers are the output. Treat the foundation as the highest-paid work you do.

Part 6 — Setting Up to Earn Legally (France)

- **Auto-entrepreneur (micro-entreprise)** — register free at autoentrepreneur.urssaf.fr. Simplest structure for tutoring + freelance income; low charges, simple declaration.
- **With RQTH** — AGEFIPH can co-fund your setup and equipment. ACRE may reduce first-year social charges.
- **Declare platform income** — Preply/iTalki earnings are declarable; the micro-entreprise covers this cleanly.
- **Keep AAH compatibility in mind** — AAH allows some earned income; declare to CAF. Earned income is partially cumulative with AAH — confirm thresholds before scaling hours.

Verify current thresholds on autoentrepreneur.urssaf.fr and caf.fr — rules change yearly. A free appointment with your local Mission Locale or a CIDFF adviser can confirm the AAH + earned-income combination for your situation.

Part 7 — The 90-Day Money Ramp

Weeks	Income action	Target
1–2	Register auto-entrepreneur. Create Preply + iTalki profiles (CELTA + IELTS front-and-centre profiles AND).	€1,000
3–4	First lessons live. Set specialist tracks. Resume outreach to 35 active leads (batch, 1 send-out/week).	€1,000
5–8	Stabilise 10–15 teaching hrs/week. Film first 3 YouTube pieces in high-energy windows.	€500–1,200/mo
9–12	Add one corporate/centre contract. Start recording one self-paced course. Pitch 1 article + 1 video.	€1,000–2,000/mo + assets building

Realistic, not hype. These rates come from the platforms your own research verified. The book/speaking income (Tier 3) compounds later and is not counted in the 90-day figures.

The one rule that protects both health and income

Build assets on the good days; let them earn on the bad days. Bipolar guarantees you cannot output evenly — so stop trying. Front-load creation into elevated and stable weeks; let Tier-3 income (courses, videos, book) carry the flat and crash weeks. That is how someone with your profile earns sustainably without burning out the engine.

Print & Pin — The Daily Card (health + money)

Cut this out. Put it where you start your day.

MORNING	■ Meds ■ Mood read: today I am ____ ■ Anchor task ____ ■ Lessons booked? ____
BEST BLOCK	■ Phone away ■ 25/5 ×2–3 ■ Premium lesson OR build a Tier-3 asset
MIDDAY	■ Paid admin (invoices, messages) ■ Outreach follow-up (batch)
DIP	■ Rest / nap / walk — never book live work here ■ Tier-3 earns for you
EVENING	■ Prep tomorrow's lessons ■ No new launches ■ Screens off 1h pre-bed
WIN TEST	Anchor task done = day counts. One paid action done = a good day.
MOOD ROUTING	High → create & pitch · Stable → teach & send · Low → admin only · Crash → rest, assets pay
NEVER ON A CRASH	■ Big decisions · cold-pitching · booking clients · all-nighters · quitting

The whole plan in one line: take meds, name your state, do one anchor task, teach in your sharp window, rest the dip, build assets on good days so they pay you on bad days, protect sleep. The income compounds; the health holds.
