

Interactions and time	Stage and Aim	Procedure (each sub-stage is marked by a bullet point)	Teaching notes for each substage	Comments for the stage
5' (Mins) T-Cl S-S Cl-T	Lead-in/context setting – to engage Ss into the topic of the lesson and get them using English. Also to activate schemata for the text	- T (teacher) introduces the lesson topic eg. with a short story, pictures or even video to get Ss engaged. T then gives a simple but interesting question related to the topic of the lesson to discuss. This could be a prediction of the text the Ss will be reading later. - Ss discuss the topic in pairs while T monitors - T conducts plenary (whole class feedback) sharing one or two interesting ideas, involving all the group. These can go on the board to be referred to later.	- This needs to be set clearly with TT (teacher talk) graded or Ss will not know what to do and will not be engaged - Remember to monitor but be careful not to intrude - Only choose one or two Ss to give ideas, get Ss talking rather than the T. Don't overrun.	Many planning hours are wasted by too much focus on the lead-in. Deal with the main reading task first.
5' T-Cl S S-S Cl-T	Reading or Listening Task. (Gist or Specific Information!) – gist: to practice skimming; SI to practice scanning.	- T sets the task. If gist, it can be a prediction based on the previous stage, or a simple closed question. If SI, then two or three questions will do. - Ss read the text on their own OR Listen - Ss compare answers in pairs (threes). - Quick feedback getting the whole class to give the answer.	- Task needs to be set clearly. Checking is a good idea, and there should be a time limit; ss should be able to get the answers relatively easily; If not it is too challenging. - Reading - Be ready to assist Ss straight away if necessary. - Remember to include this – it's important - Keep this quick and clear, DO NOT ask extra questions	The text is a basis for what we want Ss to achieve later in their speaking task. If reading it will serve as a background, if, listening, it can serve as a model.
5'-10'	OPTIONAL STAGE – Reading/writing	See notes in the stage for detail (SI) in the Reading or Listening template	See notes in the stage for detail (SI) in the Reading or Listening template	Depending on time needed for speaking, this stage can be included
5' T-Cl S S-S Cl-T	Focus on useful language – to identify items which may be useful to Ss. for the speaking task	T clarifies items of vocabulary or some functions. These can be presented one by one, or as a list for Ss to match definitions. (see Lexis Template for more info on presentation).	Make sure that items presented are only those which Ss may need to answer questions. Three or four should be a maximum; be careful not to overrun.	Make sure that this language will be useful for the speaking task. Remember that this language is not a main lesson aim; the aim is speaking for fluency on the topic.
3' T-Cl S	Speaking Preparation – to give Ss thinking time to plan what they will write.	- T sets task. Distributes a template for Ss to note down ideas OR for shorter speaking tasks the teacher gives a demonstration first - Ss note down ideas.	- Needs to be set clearly. Show template. If giving a demo, make this model challenging but achievable. - T monitors carefully. Some Ss may need help in thinking of ideas.	Typically Ss prepare on their own, though they could work together if the T thinks it is a good idea. Creating a template is important.
17-27' T-Cl S (S-S) S-S-S S-S CL-T	Speaking - Ss speaking for fluency, with teacher setting a clear communicative purpose	- T Sets the task clearly. Often demo using a student can be a good idea. - Option 1: – Ss talk in pairs - Option 2: Students speak to a variety of partners. This could be done as <i>rearrangement (e.g. into threes), Carousel, mingle, or lines (speeddating).</i> - Ss put back into pairs to share what they have learnt - T get feedback on the activity focusing on content.	- Ss can be asked to make notes - This p/work can be omitted depending on time/activity - T monitors closely, supporting where needed but without interfering. Notes down ideas & language for FB - T monitors carefully. Notes down lang and ideas as above - Best to focus on one or two ideas only. Involve all the SS, keep TTT down	A clearly designed template will help. There are different ways to organise this, but moving students around is central in maximising speaking practice time.
3' T-Cl	Error correction – Ss react to each others texts. T provides lang feedback	- T puts examples of language the Ss used on the board. Mostly errors but one or two examples of good use too. - Elicits corrections/comments from Ss.	- T could note lang on the board during the actual speaking to use time well. - If extra time, Ss could discuss in pairs.	This rounds off the lesson with FB on language.
