

Procedure – Basic template for a 45 Minute Lesson, using a text Situational Presentation to introduce **Lexis (Vocabulary)**

Interactions and time	Stage and Aim	Procedure (each sub-stage is marked by a bullet point)	Teaching notes for each substage	Comments for the stage
5' (Mins) T-Cl S-S Cl-T	Lead-in/context setting – to engage Ss into the topic of the lesson and get them using English. Also to activate schemata for the text	- T (teacher) introduces the lesson topic eg. with a short story, pictures or even video to get Ss engaged. T then gives a simple but interesting question related to the topic of the lesson to discuss. This could be a prediction of the text the Ss will be reading later. - Ss discuss the topic in pairs while T monitors - T conducts plenary (whole class feedback) sharing one or two interesting ideas, involving all the group. These can go on the board to be referred to later.	- This needs to be set clearly with TT (teacher talk) graded or Ss will not know what to do and will not be engaged - Remember to monitor but be careful not to intrude - Only choose one or two Ss to give ideas, get Ss talking rather than the T. Don't overrun.	Many planning hours are wasted by too much focus on the lead-in. Deal with the main reading task first.
10' T-Cl	Presentation. To clarify MFPR for the TL (meaning, form, phonology & register)	For each item in turn the teacher follows the following procedure - T gives a clear context to try to elicit the TL (target language) - T clarifies the item (where necessary) using CCQs - T gives the oral model and drills the item - T gives the written model including part of speech and key phonology	- For simple items this can be flashcards (pictures) or realia (real objects). For more complex items, T tells a story setting a clear context to elicit the item - For basic items, the picture etc is enough. Otherwise CCQs - Include individual and choral drilling. Don't skip on it. - Organise this clearly on the board	This needs to be conducted at a good pace, but with all Ss involved throughout. It is a good idea to quickly re-elicit the items at the end to check.
10' T-Cl S S-S Cl-T	Controlled Practice. To consolidate Ss knowledge of TL before Freer practice	- T sets task (e.g. gapfill, matching etc) - Ss complete individually while T monitors and supports - Ss compare together; T monitors - Plenary. T goes over answers, clarifying where needed and involving all the group	- Set the task clearly. The first as an example is a good idea - Be ready to help but not give answers - T makes mental note of difficult questions - Make sure you clarify difficult answers, referring back to presentation using CCQs etc is a good idea. Involve the Ss	Timing is important so don't let it go on too long. Ss still need the practice though.
20' T-Cl S S-S (S-S-S) Cl-T	Freer Practice. For Ss to use the TL in a more authentic and personalised way. Also for Ss to receive FB on this.	- T Sets the task clearly. Often demo using a student can be a good idea. - Option 1:– Ss talk in pairs - Option 2: - Students speak to a variety of partners. This could be as <i>rearrangement (e.g. into threes), Carousel, mingle, or lines (speeddating).</i> - Option 3: - Ss put back into pairs to share what they have learnt - T gets feedback on the activity focusing on content. Then the T <u>must</u> give FB on use of TL.	- Ss can be asked to make notes - This can be the only speaking if time is relatively short - T monitors closely, supporting where needed but without interfering. Notes down ideas & language for FB - T monitors carefully. Notes down language and ideas as above - Best to focus on one or two ideas only. Involve all the Ss, keep TTT down. Clear FB on TL is necessary for a very good lesson.	This is organised along the lines of the main activity of a speaking lesson. Of course Ss need to speak, but how this is organised is optional depending on time, level and the activity. The lesson needs to be rounded off with FB on content and TL.
