

Productivity, Health & Income Plan

Sourov Deb | Saint-Pierre, La Réunion | Built on the medical record of 19 May 2026

What this plan does

It joins two things that usually fight each other: a health routine that respects bipolar I, ADHD, depression, and clinical insomnia — and a money engine that fits inside that routine instead of breaking it. Each income task is matched to a mood-state. You earn **with** the condition, not against it.

The science behind it

- **Ultradian rhythm.** The brain works in ~90-minute cycles. Work one cycle, rest, repeat. Do not grind past it.
- **ADHD interest-based focus.** Attention follows interest and urgency, not importance. Route hard tasks into interest-driven formats.
- **Social rhythm therapy (bipolar).** A stable daily rhythm — fixed wake, meals, sleep — measurably reduces mood episodes.
- **Behavioural activation (depression).** Action comes before motivation. One small task lifts a flat day.
- **Task-batching.** Switching tasks wastes up to 40% of productive time. Group similar work into one block.

Part 1 — Your Documented Income Assets

What you already hold — not aspirational. Every income stream draws on these.

Asset (verified)	Income use	Premium angle
Cambridge CELTA (2026)	Qualifies you on every platform	Raises your hourly rate
IELTS Specialist (IDP, 2026)	Exam-prep tutoring	Highest-paying niche, €25–50/h
DCL Français (GRETA)	Bilingual credibility FR/EN	Opens French corporate clients
11 yrs anglophone hospitality	Business + Hospitality English	Hotel + tourism training
Aviation / Medical English	Specialist English	Premium: Air Austral, clinics
Sommelier / barista certs	Wine + F&B English	Rare, distinctive niche
4–5 languages	Multilingual tutoring + reach	Bengali/Hindi underserved online
YouTube + video (4 tools)	Content + service income	Edit-for-hire, course creation
61-org outreach list (built)	Warm B2B pipeline	35 active leads to follow up

Part 2 — The Three-Tier Income Engine

Three tiers by speed-to-cash. Run them in parallel, but launch in order.

Tier 1 — Cash this month: online 1:1 tutoring

Fastest route. Your own research verified these platforms and rates. Sign-up takes 1–2 weeks.

Platform	Course types	Verified rate	Sign-up
Preply	1:1 + business	€15–50/h	preply.com/en/become-a-tutor
iTalki	1:1 + professional	€12–40/h	italki.com/teacher/apply
Lingoda	Group + private (FR-friendly)	€25–45/h	teach.lingoda.com
Verbling	1:1 + group	€10–45/h	verbling.com
Superprof (FR)	Local + online, you set price	Your rate	superprof.fr

Launch: put “Cambridge CELTA Certified” in the first line of every profile; list specialist tracks (Aviation, Medical, Business) for premium pricing; start Preply + iTalki together. Realistic ramp: **€500–€2,000/month within 1–3 months** at 10–15 hours/week.

Tier 2 — Build over 1–3 months: B2B + content services

- **Follow up the 35 active leads** in your outreach list (your email tool already does the send-and-track rhythm).
- **Corporate / centre contracts** — CCI, GRETA, hotels, Air Austral. Higher day-rates, CPF/OPCO-fundable.
- **Video editing for hire** — you have four software tools. Other creators, local businesses (Malt, Fiverr).
- **Specialist workshops** — one-off paid sessions in Aviation or Hospitality English for local employers.

Tier 3 — Compounds over 3–12 months: assets that pay while you rest

- **YouTube channel** — teaching + neurodiversity. Ad and sponsor income builds slowly, pays passively.
- **Self-paced course** — record your IELTS or Aviation English once; sell repeatedly (Udemy, Teachable).
- **The book + the story** — advances, speaking fees, and a platform that raises every other rate.
- **Blog** — Medium Partner / Substack. Modest but compounding; feeds the book and channel.

Why this order: Tier 1 stabilises cash and mood. Tier 2 raises the ceiling. Tier 3 builds assets that earn on your low-energy days — the days the condition guarantees you will have.

Part 3 — Routing Income Work by Mood-State

Where health and money meet. Match the task to the state — never force creation on a crash day.

State	Best income work	Why it fits
Elevated / hypomanic	Film video, draft course, write, cold-pitch	High energy suits creation + outreach
Stable / level	Teach booked lessons, send applications, edit	Reliable focus suits client work
Flat / low	Reply to 1 student, light editing, invoices	Low-effort paid admin keeps income alive
Crash / shutdown	Nothing new — Tier-3 assets earn for you	Pre-built courses/videos pay while you recover

Core insight: **build Tier-3 assets during the highs so they carry your income through the lows.** Bipolar makes even daily output impossible — so engineer income that does not require it.

Part 4 — The Integrated Day

Built around morning Concerta, your sharp late-morning window, and severe afternoon sleepiness.

Window	Health layer	Income layer
On waking	Meds, water, light; one-line mood read	Glance at booked lessons / one money task
~1.5h after meds	Deep block 1 (25/5 ×2–3)	Premium lesson OR build a Tier-3 asset
Late morning	Deep block 2 if energy holds	Second lesson OR batch outreach follow-ups
Early afternoon	Low-cognitive window	Paid admin: invoices, messages, scheduling
Afternoon dip	Rest / nap / walk (non-negotiable)	Tier-3 earns passively — no live work here
Late afternoon	Light creative, interest-led	Film B-roll, edit video, record course
Evening	Wind-down; screens off ~1h pre-bed	Prep tomorrow's lessons; then stop

Book live lessons in your stable morning window. Never schedule clients into the afternoon dip — fatigue cancellations cost rating and money.

Part 5 — The Non-Negotiable Foundation

No income engine runs on a broken foundation. These come first, always.

Sleep (from your clinical ISI score):

- Fixed wake time every day — the strongest single regulator of bipolar mood.
- Screens off ~1h before bed; take hydroxyzine as prescribed.
- Push the referred sleep study — untreated apnea would sabotage focus, mood, and earnings.

Treatment that protects income:

- **ALD via Dr. Pauvert** — frees the cost of all psychiatric care (fastest financial win).
- **MDPH / RQTH** — unlocks AGEFIPH funding for training and auto-entrepreneur setup.
- **Monthly psychiatric review** — the mood-stabiliser decision lives here. Stable mood = consistent income.
- **UPT trauma referral** — pending; book when the letter arrives.

Income and treatment are one system. Stable sleep and mood are the engine; the money tiers are the output. Treat the foundation as the highest-paid work you do.

Part 6 — Setting Up to Earn Legally (France)

- **Auto-entrepreneur (micro-entreprise)** — register free at autoentrepreneur.urssaf.fr. Simplest structure for tutoring + freelance income.
- **With RQTH** — AGEFIPH can co-fund setup and equipment; ACRE may reduce first-year charges.
- **Declare platform income** — Preply/iTalki earnings are declarable; the micro-entreprise covers this cleanly.
- **AAH compatibility** — AAH allows some earned income; declare to CAF. Confirm thresholds before scaling hours.

Verify current thresholds on autoentrepreneur.urssaf.fr and caf.fr — rules change yearly. A free appointment with your Mission Locale or a CIDFF adviser can confirm the AAH + earned-income combination.

Part 7 — The 90-Day Money Ramp

Weeks	Income action	Target
1–2	Register auto-entrepreneur. Create Preply + iTalki profiles (CELTA + IELTS first). Profile live	Profile live
3–4	First lessons live. Set specialist tracks. Resume outreach to 35 leads (1 send-day/week)	First \$ earned
5–8	Stabilise 10–15 teaching hrs/week. Film first 3 YouTube pieces in high-energy with 500s	\$500s–1,200/mo
9–12	Add one corporate contract. Record one self-paced course. Pitch 1 article + 1 outreach	\$1,000–2,000/mo

Realistic, not hype. Rates come from the platforms your own research verified. Book and speaking income (Tier 3) compounds later and is not counted in these 90-day figures.

The one rule that protects health and income

Build assets on the good days; let them earn on the bad days. Bipolar means you cannot output evenly — so stop trying. Front-load creation into elevated and stable weeks; let Tier-3 income carry the flat and crash weeks. That is how someone with your profile earns sustainably.

Print & Pin — The Daily Card

Cut this out. Put it where you start your day.

MORNING	Meds / Mood: today I am ____ / Anchor task ____ / Lessons?
BEST BLOCK	Phone away / 25-5 ×2–3 / Premium lesson OR build a Tier-3 asset
MIDDAY	Paid admin (invoices, messages) / Outreach follow-up (batched)
AFTERNOON DIP	Rest / nap / walk — never book live work here / Tier-3 earns for you
EVENING	Prep tomorrow lessons / No new launches / Screens off 1h pre-bed
WIN TEST	Anchor task done = day counts. One paid action done = a good day.
MOOD ROUTING	High: create+pitch / Stable: teach+send / Low: admin / Crash: rest
NEVER ON A CRASH	Big decisions / cold-pitching / booking clients / all-nighters

The whole plan in one line: take meds, name your state, do one anchor task, teach in your sharp window, rest the dip, build assets on good days so they pay you on bad days, protect sleep.
